The Intelligent Home

COMPLETE HOME AUTOMATION

A more considered way to live.

ENGINEERED TO **UPSCALE**

THE POSSIBILITIES

Every Element. One Intelligent Home.

Bring everyday systems together through one connected, thoughtfully designed home.

Lighting
Switching, dimming & scenes

Curtains & blinds
Open, close & schedule

Gates & shutters
Automated access & movement

Climate
Air conditioning & comfort

Entertainment
Audio, video & home theatre

Security
Surveillance & intrusion alerts

Door access
Digital locks & video door phones

Fans & appliances
Convenient everyday control

Utilities
Geysers, pumps & selected loads

Outdoor spaces
Landscape lighting & irrigation

Sensors
Presence, light & environmental inputs

Connected devices
Networked systems & integrations

THE EXPERIENCE

One Touch. A Different Experience.

A scene brings several actions together, so your home can respond to a moment, a routine or a single command.

01
WELCOME HOME
Entry lights switch on • preferred climate setting • selected curtains open

02
GOOD MORNING
Blinds rise • lights brighten gradually • a comfortable climate setting begins

03
MOVIE TIME
Curtains close • lights dim • home theatre and audio are prepared

04
GOOD NIGHT
Selected lights switch off • curtains close • night-time security is enabled

05
AWAY MODE
Selected loads switch off • occupancy simulation or security functions activate

06
ENTERTAIN
Ambient lighting • preferred music zone • comfortable room setting

ENGINEERED TO *UPSCALE*

ORBi AUTOMATIFY

Wired Automation

A wired automation system uses dedicated control cabling and connected devices to coordinate functions throughout the home.

Centralised control

Control equipment and actuators are organised as part of a planned system.

Reliable infrastructure

Designed alongside electrical and building services.

SUPPORTED TECHNOLOGY FAMILIES

KNX® | Bus Pro™ | Cresnet® | Other project-specific platforms

AUTOMATION TECHNOLOGIES

A Connected Wired Ecosystem

A typical wired solution brings together control devices, field devices and the systems they operate.

USER INTERFACES

Keypads • Touch panels

CONTROL LAYER

Controllers • Logic

FIELD DEVICES

Actuators • Dimmers

HOME SYSTEMS

Lights • HVAC • Curtains

Designed with the building

Infrastructure can be coordinated with electrical and interior plans.

Room-to-room control

Functions can be grouped by room, floor or use case.

A unified experience

Multiple home systems can be brought into shared scenes.

ENGINEERED TO ***UPSCALE***

ORBi AUTOMATIFY

AUTOMATION TECHNOLOGIES

Wireless Automation

Wireless automation connects compatible devices through radio or Wi-Fi networks, enabling flexible control with less dependence on dedicated control cabling.

Flexible deployment

Useful for new projects and selected existing-home upgrades.

Connected devices

Gateways, switches, modules and sensors work as a coordinated ecosystem.

SUPPORTED TECHNOLOGY FAMILIES

Zigbee® | Z-Wave® | Wi Fi®

ENGINEERED TO *UPSCALE*

ORBi AUTOMATIFY
Engineered to UPSCALE

SMART UPGRADES

Retrofit Insert Relays

Add smart control to selected existing circuits by fitting compact relay or dimmer modules behind compatible switches or at suitable electrical points.

Keep the familiar switch

Existing wall controls may be retained, subject to wiring and product compatibility.

Add connected control

Enable app, schedule or scene control with compatible modules and gateways.

A GOOD FIT FOR

Renovations • Existing apartments • Selective smart upgrades

INTELLIGENT LIVING

Lighting Solutions

Shape the mood, function and atmosphere of every room with coordinated lighting control.

01

On / Off Control

Convenient switching by keypad, app, sensor or schedule.

02

Dimming

Adjust brightness to suit the activity and time of day.

03

DALI Control

Addressable lighting control for compatible drivers and fixtures.

04

Colour & Tunable Light

RGB, RGBW and tunable white options where supported.

05

Lighting Scenes

Coordinate multiple circuits for everyday moments.

06

Automated Schedules

Use time, occupancy or other triggers to control lighting.

ENGINEERED TO **UPSCALE**

ORBi AUTOMATIFY
Engineered to UPSCALE

MOTORISED SOLUTIONS

Curtains & Blinds

Bring window treatments into the connected home with motorised movement, scheduled operation and scene-based control.

Curtain systems

Motorised tracks and compatible curtain motors.

Blind systems

Roller, Venetian and other compatible blind options.

MOTORISED SOLUTIONS

Gates & Rolling Shutters

Automate key entry and closure points for easier everyday access and coordinated property control.

Gate automation

Sliding and swing gate operators with suitable access controls.

Rolling shutters

Motorised shutter operation for selected residential openings.

ENGINEERED TO *UPSCALE*

ORBi AUTOMATIFY
Engineered to UPSCALE

SECURITY SOLUTIONS

Entrance Security

Make the front door more connected with visitor communication, visual verification and convenient digital access.

Video Door Phones

Outdoor station, indoor monitor and visitor communication.

Digital Door Locks

Fingerprint, PIN, card, mobile or key access as supported.

ORBi AUTOMATIFY
Engineered to UPSCALE

SECURITY SOLUTIONS

Intrusion Detection

A purpose-designed intrusion system monitors selected entry points and spaces, helping alert occupants to unexpected activity.

01

Perimeter detection

Door and window contacts or other suitable sensors.

02

Interior detection

Motion detectors and other compatible devices.

SYSTEM ELEMENTS

Alarm panel • Door/window contacts • Motion detectors • Siren • User interface

ORBi AUTOMATIFY

SECURITY SOLUTIONS

Surveillance

A well-planned CCTV system provides visibility of important areas, with recording and remote viewing through compatible equipment.

IP Cameras

Indoor, outdoor and application-specific camera options.

Recording & Viewing

NVR, storage and authorised remote monitoring.

ENGINEERED TO *UPSCALE*

CONNECTED LIVING

Home Networking

A dependable home network is the foundation that connects automation, **entertainment**, security and everyday devices.

Wi-Fi Coverage

Access points planned for consistent connectivity.

Wired Infrastructure

Routers, switches, structured cabling and network racks.

A CONNECTED FOUNDATION

Automation • CCTV • AV • Workspaces • Personal devices

CONNECTED LIVING

Audio Visual Solutions

Bring entertainment and media systems together through thoughtfully designed audio, video and control.

Home Theatre

Displays or projection, surround sound and source control.

Multi-Room Audio

Distributed sound across selected rooms and zones.

THE EXPERIENCE

Watch • Listen • Present • Enjoy — from a simple, intuitive interface

ENGINEERED TO *UPSCALE*

ORBi AUTOMATIFY

INTELLIGENT ENVIRONMENT

Sensors

Sensors provide the information that allows a home to respond automatically to its environment and occupants.

01

Motion & Occupancy

Detect movement or room occupancy.

02

Presence

Support finer presence detection where compatible.

03

Temperature

Measure room temperature for climate logic.

04

Humidity

Monitor moisture levels in selected spaces.

05

Light / Lux

Respond to available natural light.

06

Door & Window

Detect open or closed status.

07

Smoke & Safety

Support compatible safety monitoring devices.

08

Environmental

Other supported inputs for tailored automation.

SENSE → DECIDE → ACT | Sensors trigger the right response through configured automation logic.
